SECTION VI  
SUPPLEMENTAL INFORMATION

1. Effect of Terrorists Acts on Local Government:

VC terrorist activities directed against local government officials decreased during January. Although most assassinations were committed in hamlets, there were no indications that officials on this level of government have slackened their efforts or determination.

2. Noticeable Trends:

The VC have intensified their terrorism campaign against members of the People's Self Defense Force (PSDF) throughout the country and numerous casualties and attacks on PSDF installations have been reported. Although assassinations of hamlet chiefs and officials decreased, they continue to be VC targets. The sharp increase in abductions could indicate that the VC are encountering difficulties in voluntary recruitment for their armed forces; however, an analysis of the statistics revealed that the majority of the victims abducted during this period were used for forced labor or propaganda indoctrination and subsequently released. In addition to the efforts of the VC to recruit young females, an increase in abductions of young females is noted.
